

The Impact of Code Review Sentiment on Pull Request Success: A Comparative Analysis of Selected Pull Requests on GitHub

Author: *Tayebe Kavousi*

Document: *Thesis Outline*

1. Introduction

- 1.1. Background and Motivation
- 1.2. Research Objectives
- 1.3. Research Questions
- 1.4. Scope and Limitations
- 1.5. Research Contributions
- 1.6. Thesis Structure

2. Related Work

- 2.1. Overview of Existing Studies
 - 2.1.1. Prior Research
 - 2.1.2. Research Gaps & Limitations
- 2.2. Terminology and Definitions
 - 2.2.1. Sentiment analysis
 - Definition
 - Application
 - Challenges
 - 2.2.2. Deep Learning Models
 - Transformer Models
 - DistilBERT, DeBERTa, CodeBERT
 - Fine-tuning
 - Model Performance
 - 2.2.3. Code Review and PR Success
 - Definition and Importance
 - PR Success Metrics
 - Factors Affecting PR Acceptance
 - 2.2.4. Statistical Methods
 - Chi-Square Test
 - Cramér's V

3. Methodology

3.1. Research Approach

3.2. Model Selection

3.2.1. Training Set

3.2.2. Preprocessing data

3.2.3. Fine-Tuning

3.2.4. Model Evaluation

3.3. Data Collection

3.3.1. Sample Size Calculation

3.3.2. Data Collection Criteria

3.3.3. Data Cleaning

3.3.4. Collected Information

3.4. Sentiment classification

3.4.1. Comments and Reviews Sentiment Classification

3.4.2. PRs Sentiment Measurement

3.4.3. PR Success Metrics

3.5. Hypothesis Testing

3.6. Validity and Reliability

4. Results and Findings

4.1. Labelled Data Preparation

4.1.1. Dataset Balancing

4.1.2. Data Cleaning and Preprocessing

4.1.3. Data Splitting and Sampling Strategy

4.2. Sentiment Analysis Model Development

4.2.1. Model Selection

4.2.2. Training and Fine-Tuning

4.2.3. Baseline Comparison

4.2.4. Performance Metrics and Error Analysis

4.3. PR Data Collection

4.3.1. Retrieving PRs, Comments, and Reviews

4.3.4. Data Processing and Preparation

4.4. Sentiment Analysis on PR Data

4.4.1. Sentiment Classification of PR Comments and Reviews

4.4.2. Aggregated PR Sentiment Scores

4.5. Statistical Analysis and Hypothesis Testing

4.5.1. PR Success Measurement

4.5.2. Hypothesis Testing

4.5.3. Findings for Research Question #1

4.5.4. Findings for Research Question #2

5. Discussion

5.1. Interpretation of Results

5.1.1. Model Performance Analysis

5.1.2. Impact of Sentiment on PR Success

5.3. Discussion of Limitations

5.3.1. Limitations in Sentiment Classification Models

5.3.2. Uncontrolled External Factors Affecting PR Success

6. Conclusion

6.1. Summary

6.2. Recommendations for Future Research
